open 7 days: 9-6 pst

Do you need your image to be a certain size on film?

Our film recorder prints the image to this size at 100% scale.

Our standard printing scale is at 96% so the slide mount doesn't cover too much of the edges. The printable area is 4096px x 2731px, 24mm x 36mm, or .945in x 1.417" at 300dpi.

The JPG in this zip file is sized correctly. Open the image in Photoshop or any other image editing software. Change your ruler to whatever you need. Now scale your image to the exact dimensions you want printed onto this image. Make sure you hide or fill in your background..

Save your image as a jpg and order using our uploader.

It is very important to mention "print at 100%" in the special instruction box.

Crop your object to the size you want at 2891 dpi. Drag it into a blank canvas sized the same size as the image (slide scale).
